PORTFOLIO

Under development...

ABOUT ME:

I'm David, I'm 29 years old and I'm from Buenos Aires, Argentina. I love to challenge myself daily since there is always something new to learn when it comes to programming. I have experience in collections and administration, a background that currently guides me: when I reconnected with programming I noticed that I find it easy to learn quickly, be organized, communicate, and many other skills that have helped me become a good programmer and tutor.

FORMAL WORK EXPERIENCE FULL STACK DEVELOPER
